TECHNICAL SKILLS

Proficient: Javascript, Node.js, Express.js, Angular, Sequelize, PostgresSQL, HTML, CSS, Git/GitHub
Knowledgeable: test-driven development, RESTful API, Heroku deployment process
Currently Learning: React/Redux, MongoDB, Ionic mobile development

PROJECT EXPERIENCE

Portfolio | http://joserenteria.nyc | https://github.com/clockwrk/portfolio
Angular based single-page application for presenting my projects.
- Programmed all the front-end HTML, CSS and Javascript code.
- Setup the server with Node.js, Express.js and the database with PostgresSQL.
- Added custom CSS animations.
- Leveraged code injection to enhance the functionality of the site.
- Deployed on Heroku.

ImVue | https://radiant-cliffs-28831.herokuapp.com | https://github.com/clockwrk/ImVue
Android mobile site that allows you to save an art project to a specific geolocation.
- Designed the database scheme to store geolocation based art projects.
- Wrote queries based on longitude and latitude to find art projects in a specified area.
- Used Google Maps API to mark where projects were located.
- Implemented user logging using local and Facebook strategy.

Markey | http://markey.herokuapp.com | https://github.com/gewl/stackhub
eCommerce site simulating selling concert tickets
- Assembled the artist feature of the site from the front-end to the back-end.
- Implemented user logging and session storage.
- Resolved git conflicts and integrated artist, concert, venue into a single development branch.

WORK EXPERIENCE
